UNITED STATES DEPARTMENT OF AGRICULTURE

Supplement for 1949 to Miscellaneous Publication No. 691

Washington, D. C. Issued September 1950

CONSUMPTION OF FOOD IN THE UNITED STATES, 1909-48

INTRODUCTION

This supplement contains revisions for the tables published in the Consumption of Food in the United States, 1909-48, Miscellaneous Publication No. 691, as well as comparable data for 1949. The revisions result from (1) additional research on the supply and distribution of some items, (2) changes in basic data for recent years, (3) a few changes in coverage to improve the internal consistency of the data, and (4) correction of minor errors.

The tables with the revisions carry the same table numbers as the original tables and give page references to Miscellaneous Publication 691. Footnotes have not been repeated unless they have been revised. Special notes for the supplement tables carry letter references to indicate, for example, scattered corrections for previous years. The numbered references are to the original footnotes. In general, only the revised data are carried in these tables. Accordingly, in instances in which no data are given in some columns for some years or items, there has been no revision in the original data. All data for 1949 are preliminary.

Among the noteworthy revisions are those for wheat flour, to include custom milling and the revised production estimates for recent years; dry field peas; nutritive values of the per capita food supply; cheese; total milk; and peanuts.

Page 5, Table 1.- Total food utilization: Source and distribution

Item	Section A. Percentage of food utilization in each year		Section B. Percentage of 1935-39 food utilization	
	1948	1949 5/	1948	1949 5/
	Percent	Percent	Percent	Percent
Source of total foods:				
Total food utilization	100.0	100.0	132.8	134.9
Food production	94.8	95.3	125.8	128.7
Imports	5.1	5.2	6.9	6.9
Reduction in stocks	.1		.1	
Increase in stocks		.5		.7
Distribution:				
Civilian	91.4	91.2	121.4	123.1
Military including military civilian feeding	4/ 3.5	4/ 3.3	4/ 4.7	4/ 4.4
Department of Agriculture				
Net purchases	2.1	2.2	2.7	2.9
Deliveries	2.2	1.6	2.8	2.2
Reduction in stocks	.1		.1	
Increase in stocks		.6		.7
Commercial exports and shipments	3.0	3.3	4.0	4.5

Page 6, Table 2.- Food supplies and distribution compared with domestic food production

Item	Section A. Percentage of food production in each year		Section B. Percentage of 1935-39 food production	
	1948	1949 5/	1948	1949 5/
	Percent	Percent	Percent	Percent
Food production index	134	137		
Supply:				
Food production	100	100	134	137
Imports	5.4	5.4	7.3	7.4
Reduction in stocks	.1		.1	
Increase in stocks		.5		.7
Total	105.5	104.9	141.4	143.7
Distribution:				
Civilian	96.4	95.7	129.2	131.1
Military including military civilian feeding	3.7	3.4	5.0	4.7
Department of Agriculture:				
Net purchases	2.2	2.3	2.9	3.1
Deliveries	2.3	1.7	3.0	2.3
Reduction in stocks	.1		.1	
Increase in stocks		.6		.8
Commercial exports and shipments	3.2	3.5	4.3	4.8

Page 15, Table 3.- Volume of agricultural production for sale and for farm home consumption, United States

(Index numbers: 1935-39=100)

Item	1947	1948	1949
Crop groups:			
Food grains	197	189	166
Feed crops	131	207	185
Cotton (lint and seed)	91	115	125
Oil bearing crops	300	367	329
Tobacco	145	136	136
Truck crops	141	144	144
Fruits and nuts	126	115	121
Vegetables	107	124	114
Sugar crops	110	89	99
All crops	135	152	146
Livestock groups:			
Meat animals	145	134	139
Poultry and eggs	157	153	169
Dairy products	117	114	117
All livestock	137	130	136
All commodities	136	138	140
Food:			
Crops	147	144	136
Livestock	138	131	138
Total	140	134	137

Note: Revisions prior to 1947 are as follows: Crop groups -- all crops, 110 in 1941; Fruits and nuts, 116 in 1942 and 113 in 1945.

Page 16, Table 4.- Total and per capita volume of agricultural food production for sale and for farm - home consumption

(Index numbers: 1935-39=100)

Item	1947	1948	1949
Total production:			
Food:			
Total	140	134	137
Crops	147	144	136
Livestock	138	131	138
Nonfood	119	156	152
Total	136	138	140
Per capita production:			
Food:			
Total	125.4	118.0	118.5
Crops	131.7	126.8	117.6

Rice (milled):						
Total rice consumed b/	Mil.lb.	633	544	823	693	836
Per capita consumption of food products	Pound	4.9	4.0	5.8	4.8	5.7

a/ Consumption of wheat and wheat flour revised to include an allowance for custom milling and, beginning 1940, for complete revision of flour production data by Bureau of the Census. Beginning 1935 flour consumption revised further using a smaller deduction for breakfast cereals produced in the milling industry. Revised data prior to 1945 are as follows:

Year	Total wheat consumed for food		Per capita consumption of wheat flour	Year	Total wheat consumed for food		Per capita consumption of wheat flour
	Total	Per capita			Total	Per capita	
	Mil.bu.	Lb.	Lb.		Mil.bu.	Lb.	Lb.

1/ See text for description of methods used and indications of limitations of data. Civilian consumption only, 1941-49. Data for 1949 are preliminary.

2/ Sum of approximate retail weights of individual products.

3/ Allows for breakage from farm to retail.

4/ Excludes bacon and other fat pork cuts. Includes edible offal, game, and small quantity of noncommercial fish.

5/ Includes butter. Actual weight except for "other edible fats and oils."

6/ Nuts on a shelled basis.

7/ Including fresh and processed items and produce of town and city gardens.

8/ Excluding use in condensed milk, processed fruits and vegetables.

9/ Includes coffee on roasted basis, and chocolate liquor equivalent of cocoa and chocolate products.

10/ Average for 1935-39 is approximately 1,518 pounds.

905360 O - 50 - 3

1/ Quantities of nutrients computed by Bureau of Human Nutrition and Home Economics on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of town and city gardens, prepared by Bureau of Agricultural Economics. No deduction has been made in the nutrient estimates for loss or waste of food in the home or for destruction or loss of nutrients during the preparation of food. Civilian per capita only, 1941-49.

2/ Data for 1941-49 for iron, thiamine, riboflavin and niacin include estimates of the quantities of these nutrients added to prepared cereals, white flour and bread.

3/ Margarine estimated to be fortified with Vitamin A at the rate of 15,000 International units per pound.

12/ Includes estimate of stocks not carried forward in 1948 beginning stocks.
13/ Includes estimate of canned pineapple shipped from Hawaii.
14/ Includes estimate of shipments to Hawaii and Alaska.

3/ (Revised) Includes 103 million pounds transferred from military stocks.
7/ Transferred from military stocks.
8/ Includes 86 million pounds shipped by UNRRA in 1946 and 1 million in 1947.
9/ Includes an estimate of pineapple juice shipped from Hawaii.
10/ Includes estimates of shipments to Hawaii and Alaska.

Note: Total production for 1927 reads 25,576; should read 25,476. Fourth column under Supply reads Exports; should read Imports.

a/ Commercial production included in the total for each year is as follows: 1929, 12,034; 1930, 12,074; 1938, 12,944; 1939, 13,220; 1944, 14,911; 1945, 15,744; 1946, 17,350; 1947, 15,570; 1948, 16,238; 1949, 15,872.

b/ Shrinkage and waste.

Note: Commercial exports for 1938 reads 65, should read 66. Civilian disappearance for 1938 reads 4,028, should read 4,027. Department of Agriculture deliveries for 1945 reads 70, should read 170. Insert 7/ in Military column heading. Delete footnote reference 1/ in stub for years 1942 and 1943.

11/ Differences in ending stocks in 1924, 1929, and 1930 and beginning stocks the following years are due to changes in coverage. For each year beginning and ending stocks are comparable.

a/ Receipts from foreign sources.
b/ Receipt from territories.
c/ Refined basis.
11/ (Revised) Includes 1 thousand short tons for civilian feeding.
Note: Estimates of civilian disappearance in 1935-49 have been adjusted for changes in invisible stocks held by industrial users, wholesalers, and retailers. Changes in invisible stocks are only rough approximations since reports of such stocks to the Sugar Branch of the Department of Agriculture do not constitute an adequate sample of total invisible stocks. However, they are useful for indicating approximate directional changes in invisible stocks for the purpose of estimating net disappearance of sugar for domestic civilian consumption. The adjusted estimates of total civilian disappearance for 1935-49 are as follows, in thousand tons, raw basis:

1935 6,609	1940 6,763	1945 5,105
1936 6,697	1941 7,354	1946 5,548
1937 6,642	1942 6,113	1947 7,000
1938 6,650	1943 5,547	1948 7,484
1939 7,060	1944 6,158	1949 7,589

1/ Items covered: All types of cheese except full-skim American cheese and cottage, pot and baker's cheese. includes production by factories and quantities made on farms until 1927 when farm cheese ceased to be a significant factor. Data for 1909 and 1919 are as reported by the Census of Manufactures; estimates of total production for the years between 1909 and 1919 were derived by interpolation on the basis of market receipts data; for the intercensual years 1919-29, annual estimates were interpolated on the basis of data compiled by the Bureau of Agricultural Economics for part of the factories producing in that period; for 1930 to date, the data are as published by the Bureau of Agricultural Economics in Production of Manufactured Dairy Products; output of cheese on farms through 1926 was determined by interpolation between census years.

2/ Stock data cover quantities in commercial storage warehouses, reported beginning 1916 in the Cold Storage Report, Production and Marketing Administration.

3/ Data on imports, exports, and shipments are those published by the Department of Commerce, except for the period during World War II when this information was supplemented and partially replaced by data from Department of Agriculture records. Imports prior to 1934 were "general imports", while for 1934 and following years they are "imports for consumption".

4/ Cold-storage stocks include approximately 12 million pounds held by USDA and military.

5/ The total stocks of 20 million pounds include about 8 million pounds held outside commercial cold storage.

6/ Cold-storage stocks of 176 million pounds include about 102 million pounds held by Department of Agriculture and military. USDA holdings outside of commercial cold storage estimated at 40 million pounds and commercial holdings at 5.5 million pounds.

7/ Cold-storage total of 145 million pounds includes 75 million pounds held by USDA and military. USDA holdings outside commercial cold storage totaled approximately 11 million pounds and commercial holdings were about 5 million pounds.

8/ Includes 23 million pounds transferred from military stocks.

9/ Preliminary.

1/ Season begins approximately September. Clean-out estimated through 1940.

2/ Stock figures 1942-46 officially reported. All other years estimated. Beginning 1939, data include dealers' stocks of vegetable or garden seed as of July 1.

3/ General imports through 1933; thereafter, imports for consumption. Includes dry peas, lupines, and lentils through 1933. Beginning 1934, includes dry peas and lentils only.

4/ Includes seed for planting the dry field crop, processing crop, commercial fresh, market, farm and urban gardens. Seed to plant the dry field crop was estimated through 1940; subsequent years were reported by Crop Reporting Board. An approximation of seed to plant the green crops, based on estimated seeding rates per acre was made through 1938. Beginning 1939, data were based on disappearance of dry pea vegetable seed, fiscal year basis, as indicated by seed dealers reports and other data. Feed and loss were estimated by Crop Reporting Board.

5/ Data from U. S. Department of Commerce, except for period during World War II when this information was supplemented by data from USDA. The dry pea equivalent of dehydrated soups, etc. included beginning 1944.

6/ Adjusted for exports of garbanzos.

7/ Excludes peas transferred by army to non-military agencies.

8/ Includes 8.8 million pounds procured by army in 1943 and transferred in 1944.

9/ Includes 22.9 million pounds procured by army in 1944 and transferred in 1945.

10/ Includes 3 million pounds of chipped peas in 1946 and 2.0 million pounds in 1947 shipped for civilian feeding.

1/ Flour and other wheat products included, expressed in wheat equivalsnts. See tsxt, chaptsr 1, for further dstail. Data for 1949 are preliminary.
2/ Including stocks on farms, in terminal marksts, intsrior mills, elevatore and warehouses, msrchant mills, and beginning 1943 CCC holdings not otherwise accounted for.
3/ Feed, seed, and alcohol.
4/ Including procurement for civilian fesding in areas occupied by our armed forcee.
5/ Includes allowance for custom milling.
6/ Less than 500,000 bushels.

1/ Revised August 7, 1950. Compiled from reports of the Department of Agriculture and Bureau of the Census.

2/ Crop year beginning as follows: Southwestern area, August 1; Southeastern area, September 1; Virginia-Carolina area, November 1.

3/ 1909-37, 66.67 percent was used to convert farmer's stock peanuts to kernels basis; beginning 1938 conversion factors calculated from result of shelling operations in each year.

4/ 1920-37, October 1 stocks in crushing mills as reported by the Bureau of the Census; 1925-30, includes stocks in cold storage warehouses reported by Federal Trade Commission; beginning 1938, September 1 stocks in all positions, including oilstock peanuts, as reported by Bureau of Agricultural Economics.

5/ Represents increase in unreported stocks, mill shrinkage and adjustment for new crop peanuts included in September 1 stocks.

6/ Including shipments to Hawaii, Alaska, Puerto Rico, Virgin Islands, 1943-47; to Puerto Rico and Virgin Islands only beginning 1948.

7/ Includes consumption of commercially cleaned and shelled peanuts plus quantities used on farms and farm sales for food use.

8/ Not available.

9/ Estimated from peanut oil production.

10/ Less than 500 thousand pounds.

11/ Includes cold storage warehouse stocks as of September 1.

12/ Includes cold storage warehouse stocks as of July 1.

13/ Preliminary.

Page 186, Table 65.- Estimated shipments of major food commodities for civilian relief in areas occupied by armed forces of the United States

Food commodity	Unit	1949	Food commodity	Unit	1949
Meats (carcass weight):			Vegetables:		
Beef	Mil.lb.	3/	Canned	Mil.lb.	2
Veal	Mil.lb.	3/	Potatoes *	Mil.bu.	3/
Lamb and mutton	Mil.lb.	1	Dry edible beans, cleaned	Mil.lb.	77
Pork	Mil.lb.	1	Dry field peas, cleaned	Mil.lb.	82
Fish, canned	Mil.lb.	--	Sugar, raw	Thous. short tons	3/
Poultry and eggs:					
Eggs, dried, shell equiv.	Mil.doz	2			
Dairy products:			Grains:		
Cheese	Mil.lb.	3/	Wheat	Mil.bu.	159
Cond. and evap. milk	Mil.lb.	--	Wheat flour	Mil.lb.	286
Dry whole milk	Mil.lb.	3/	Rye	Mil.bu.	3
Dry skim milk	Mil.lb.	132	Rice, milled	Mil.lb.	4
Fats and oils:			Corn	Mil.bu.	21
Butter	Mil.lb.	--	Oats, incl. meal	Mil.bu.	1
Lard	Mil.lb.	30	Barley	Mil.bu.	16
Shortening	Mil.lb.	--	Peanuts, shelled	Mil.lb.	125
Other edible fats and oils	Mil.lb.	44	Soya flour	Mil.lb.	14
Fruit:					
Canned	Mil.lb.	3			
Dried	Mil.lb.	70			
Canned fruit juices	Mil.lb.	3/			

*Note: The figures for potatoes should read as follows: 1945 0.1, 1946 11.4, 1947 5.5, and 1948 16.5.

On page 191 (Table 67) the column heading under "Percentage of" reads "All crops"; should read "All livestock".

Page 195, Table 69.- Estimated total population of the United States, including adjustment for underenumeration of children under 5, and estimated number of persons eating out of civilian supplies

Item	1949
	Million
January 1	
Total population	148.9
Persons eating out of civilian supplies	147.4
July 1	
Total population	150.1
Persons eating out of civilian supplies	148.6

Note: Data are not based on the 1950 Census results.
